DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a multilumen catheter with a return septum, classified in class 604, subclass 6.16.
- II. Claims 11-26, drawn to a multilumen catheter without a return septum, classified in class 604, subclass 6.16.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different structures, thereby indicating different modes of operation. Furthermore, the different catheters are not disclosed as being used together, making them separate inventions.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
